CREATE YOUR OWN STATEMENT OF STYLE

Choosing DOPPLER for your home lift means a unique benefit. The ability to respond to the functional, architectural and performance requirements of your own house. Our designers create, our engineers build. Your home elevator always serves you. Feel free to imagine, we can do it for you.

ABOUT US

SUCCESS MADE IN GREECE

From a frontier industrial park in northern Greece to the markets of the world.

DOPPLER is a modern lift manufacturer. We are experts in bespoke lift design because we have the ability to research, build and produce vertical transportation systems.

Our company is a global business, as we export in 80 countries forming an export ratio of 95%.

Today Doppler is a lift solution provider known for the ability to respond.

BESPOKE DESIGN

A CANVAS OF EXPRESSION

*The elevator cabin as an artwork
in your interior.*

Print your favorite painting or your family picture.
Have the images you love to see on the TFT
screen, hear your favorite music, look yourself in
a mirror you like, put the lights you prefer.

Create a unique piece of art.

In this image you see DOPPLER
Galaxy Glass Elevator Cabin, with
glass print. The COP is inox painted
with a red RAL shade and the floor
hosts a black starlight granite. The
ceiling, the door and the door frame
is made by inox surface.

BESPOKE DESIGN

A WORLD OF OPTIONS

In style, materials and proportion.

As experts in bespoke lift design, we offer you a wide range of finishes, colors and textures to form the most stylish lift.

Glass, wood, inox, marble can surround a square, round or polygon lift cabin rolling in a panoramic or conventional form.

Our elevator cabin surfaces made by stainless steel and glass materials can be painted in a color of your preference.

The RAL color standard gives you endless variety of shades to choose.

Play with colors in door frames, corners, handrails, car operating panels, landing operating panels and skirtings.

MANUFACTURING

ENGINEERING MASTERPIECE

Performs consistently well.

Refined to every detail.
Rides smoothly in silence.
Easily installed and maintained.

Our home elevators are CE approved
with 2 years guarantee and the
ability to extend.

This panoramic aluminum elevator features a full glass cabin
with a swing door. The column LOP elevates the aesthetics of the
structure.

The inhouse R&D department and
the build-in test tower in our premises,
guarantee a mechanism that leads to
a long lasting operation.
Made by European parts.

OUR HOME ELEVATORS

FOCUS

TYPE
TRACTION

SPEED

Adjacent and through car entrance option

Standards Conformity: EN81-20/50, EN81-21 & EN81-1

2 years warranty

ELLI

TYPE
HYDRAULIC

SPEED
0.15 M/S - 0.63 M/S

LOAD
250-400 KG

Low Pit & Headroom application

Easy installation (Compact Design)

Easy Maintenance

Standards Conformity: EN81-20, EN81-41, Directive 2006/42/EC

2 years warranty

RESPECTS ENVIRONMENT

Low power consumption.

The cabin is lightened by led lights, the motor is functioning by using inverter technology and the sleep mode is enabled when the lift is not used. The least power consumption is achieved.

Recyclable.

Doppler cabins are made of glass, inox or aluminum thus a recyclable product.

Nominal demand per year for nominal values as shown 343kWh.

PROACTIVE FOR THE FAMILY

Doors that open automatically when something is in the way when they close.

In case of emergency, the elevator delivers the passengers to the closest floor (standard equipment) and opens its doors. Equipped with a telephone device always ready to call.

Offers floor access control using an authorised key or card.

Safety glasses according to European safety standards protect you and your kids. All materials used in cabin are fire retardant certified.

**CONFORMED
EN 81-20/50**

SAFE TO TOUCH, CLEAN TO BREATHE

Air Sterilizer.

It is a device built for cabin elevators, that sterilizes the air you breathe, killing 99% of germs and 99.76% influenza virus, using UV photocatalyst sterilization.

UV Antibacterial light.

A disinfection system using an UltraViolet (UV) lamp, located in the elevator ceiling, that sterilizes the surfaces efficiently at 99%.
